

# earthboard®

**A premium, bright, white paper barrier board that's engineered for recyclability**

EarthBoard® is a unique composite paperboard comprised of a bright, white, mineralized surface on select recycled, post-consumer or unbleached virgin fiberboards. EarthBoard is a recyclable material that has a premium print surface comparable to virgin bleached fiberboards.

## Printability

EarthBoard® offers a bright, white, premium print surface capable of delivering photo-quality graphics and vibrant images.

## Barrier Performance

EarthBoard has a waterproof barrier, a grease proof barrier (Kit 12) and a moisture barrier that's comparable to traditional polyethylene coating.

## Environmental Benefits

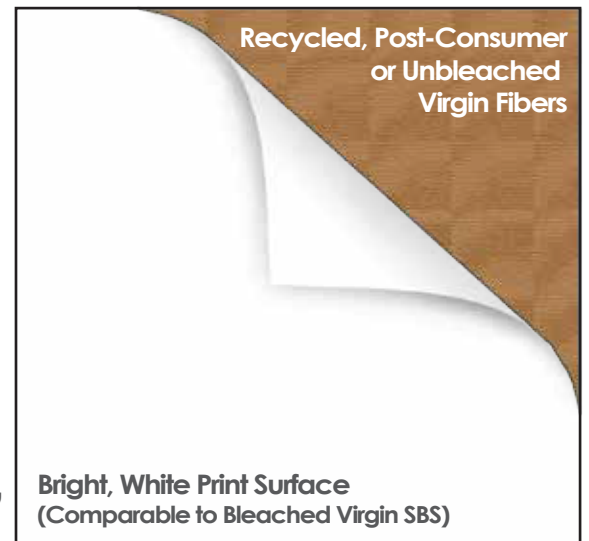

Unlike other plastic-coated paper packaging, EarthBoard often qualifies for the "Widely Recycled" How2Recycle\* mark.

\*How2Recycle mark is subject to SPC approval.  
All inquiries should be directed to [info@How2Recycle.org](mailto:info@How2Recycle.org)

## Machinability

EarthBoard® may be universally die-cut, glued and folded using existing converting machinery and printed using standard offset, flexo-graphic, digital, and roto-gravure printing techniques.

## Composite Material Layers

## Applications

Ideal for all types of folding cartons including high-end cosmetics, toys, electronics & more, EarthBoard delivers premium aesthetics & functionality using low-cost materials that are engineered for recyclability.
